Carcinoma in situ of the breast State of the art and challenges

21-22 March 2011

Monday 21 March

OUS Radiumhospitalet, Forskningsbygget, seminar rooms 1-2:

8.30-9.00	Registration
9.00-9.15	Opening
9.15-10.15	Laszlo Tabar: Heterogeneity of in situ carcinoma. Classification of in situ subtypes based on imaging appearance. New aspects on terminology and implications for treatment and research
10.15-10.30	Ragnhild Falk: Incidence of ductal carcinoma in situ in Norway
10.30-10.45	Coffee
10.45-11.15	Giske Ursin: Mammographic density and breast cancer risk
11.15-11.30	Solveig Hofvind: Risk factors for benign lesions, in situ carcinoma and invasive breast cancer in women participating in the NBCSP
11.30-12.15	Lars Akslen Pathology of carcinoma in situ of the breast
12.15-12.30	Vilde Haakensen: The biology underlying mammographic density
12.30-13-30	Lunch (food to be purchased, cafeteria accepts only credit cards)
13.30-15.00	Laszlo Tabar : Multimodality approach to the diagnosis of breast diseases Multimodality approach to screening for breast cancer
15.00-15.15	Coffee
15.15-15.45	Fredrik Wärnberg: DCIS, prognosis and risk for invasive cancer
15.45-16.00	Therese Sørlie: Molecular diversity in carcinomas in situ of the breast
16.00-16.30	Vessela Kristensen: Genetics and epigenetics of carcinomas in situ of the breast
16.30-17.00	Hege Russnes: Heterogeneity in DCIS; is it of importance, and how can it be studied?
17.00-17.15	Solveig Hofvind and Anne-Lise Børresen-Dale: Concluding remarks and future goals

Tuesday 22 March

Norwegian Cancer Registry:

09.00-10.30 **Laszlo Tabar:** A New Era in the Diagnosis and Treatment of Breast Cancer 30-year experience with mammography screening

Register to Mona Hagen (MONA.HAGEN@rr-research.no) with your name and place of work.
